

**AMENDMENTS TO THE CLAIMS**

**This listing of claims will replace all prior versions and listings of claims in the application:**

**LISTING OF CLAIMS:**

1. (original): A pressure sensitive adhesive composition  
which comprises the following components (A), (B) and (C):  
(A) A hydrolyzable silyl group-containing organic polymer containing at least 1.3 hydrolyzable silyl groups per molecule and having a number average molecular weight of 15,000 to 100,000;  
(B) A hydrolyzable silyl group-containing organic polymer containing 0.3 to 1.3 hydrolyzable silyl groups per molecule and having a number average molecular weight of 500 to 15,000, the main chain of which polymer being substantially composed of a repeating unit or units represented by the general formula -R<sup>1</sup>-O- (R<sup>1</sup> being a divalent alkylene group);  
(C) A tackifier resin.  
  
2. (original): The pressure sensitive adhesive composition according to Claim 1  
wherein the main chain of the organic polymer (A) is substantially composed of a repeating unit or units represented by the general formula -R<sup>1</sup>-O- (R<sup>1</sup> being a divalent alkylene group).  
  
3. (currently amended): The pressure sensitive adhesive composition according to Claim

~~1- or 2~~

wherein the main chain of the hydrolyzable silyl group-containing organic polymers (A) and (B) is substantially polyoxypropylene.

4. (currently amended): The pressure sensitive adhesive composition according to Claim 1  
~~any one of Claims 1 to 3~~

wherein the hydrolyzable silyl group of the hydrolyzable silyl group-containing organic polymers (A) and (B) is represented by the following general formula (I):

(wherein,  $\text{R}^2$  represents a substituted or unsubstituted monovalent organic group containing 1 to 20 carbon atoms, X represents a hydrolyzable group, and a represents 1, 2 or 3.)

5. (new): The pressure sensitive adhesive composition according to Claim 2

wherein the main chain of the hydrolyzable silyl group-containing organic polymers (A) and (B) is substantially polyoxypropylene.

6. (new): The pressure sensitive adhesive composition according to Claim 2

wherein the hydrolyzable silyl group of the hydrolyzable silyl group-containing organic polymers (A) and (B) is represented by the following general formula (I):

(wherein,  $\text{R}^2$  represents a substituted or unsubstituted monovalent organic group containing 1 to 20 carbon atoms, X represents a hydrolyzable group, and a represents 1, 2 or 3.)

7. (new): The pressure sensitive adhesive composition according to Claim 3

wherein the hydrolyzable silyl group of the hydrolyzable silyl group-containing organic polymers (A) and (B) is represented by the following general formula (I):

(wherein,  $\text{R}^2$  represents a substituted or unsubstituted monovalent organic group containing 1 to 20 carbon atoms, X represents a hydrolyzable group, and a represents 1, 2 or 3.)
